

6th March 2023

TO: ALL BIDDERS

ADDENDUM 3: CLARIFICATION

RE: TENDER FOR DESIGN, SUPPLY & INSTALLATION OF DRILLING SOFTWARE SYSTEM – REF: GDC/DO/OT/042/2022-2023

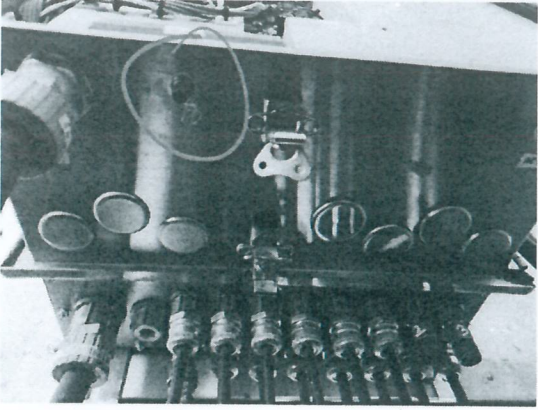

In response to the request for clarification, GDC wishes to respond as follows;

No.	Bidders Query	GDC Response
1.	We seek clarity on the price schedule, especially the subsequent breakdown after the main summary. Should we follow strictly the line items as indicated?	The line items in the subsequent table can vary but the subsequent table title and the Grand Summary Cost Table remains as is in the tender document.
2.	Under Stage Two (2) of Technical Evaluation, under Financial Capacity, there is a requirement to provide the last three (3) months certified bank statements, with a turnover of Kshs 30 Million. As described, in this bid, the last three months, would be November 2022, December 2022 and January 2023. Due to cyclic nature of cash flows and/or receivables, the three months may not be reflective of actual financial capacity and request that in the alternative, letters from bidder bank confirming access to working capital and facilities of over Kshs 30M be allowed.	This remains as is in the tender document.
3.	The Design, Supply and Installation of the Drilling Software System is a specialized service as can have attested by request for Authorization from Software Developers, Licensed Distributors/ Suppliers, request	Where the bidder only uses the experience of the specialized service providers/ sub- contractors, a joint venture will be applicable.

	that where applicable and submitted the experience of the Specialized service providers/ sub- contractors be used for technical evaluation, where applicable and evidence provider via requisite letters of intent	
4.	During the site visit there was a mention that GDC was already upgrading to new sensors from a service provider If GDC agrees to the above and that is the case, it greatly impacts on the type of solution, resources and costs that are required to do the complete project. We kindly request you to clarify this.	The system should be able to support an unlimited number of data sources.
5.	Accordingly, we also make a sincere request to accordingly extend the tender submission by another 2 weeks so all participants can get a chance to properly work and cost their proposals as it will have a major impact on the project delivery time and cost.	No extension of tender closing date
6.	Kindly clarify requirements\specifications on Swivel tool.	These are sensors on the swivel.
7.	Kindly clarify the meaning of 9 types of components\20 BHA component selection\10 points of analysis	These are tools and components that make up the BHA (Bottom Hole Assembly). The system should be in a position to do up to 10 points analysis in one run along the drilling stem components.
8.	Kindly provide more information on Hydraulics sensitivity analysis.	The system should be able to execute hydraulic calculations using existing/known models and provide optimal operations parameters.

9.	Please specify type of WITS 0 transmission port available on the Rig to transmit sensor data	This is a T-Port connector. Converts signals from the main board to the server via coaxial.
----	--	---

All other requirements/instructions including the tender closing date of **Thursday 9th March 2023 at 11.00am** remain unchanged.

Yours faithfully,

DORIS KYAKA
MANAGER, SUPPLY CHAIN
